International filing date (day/month/year)

03.06.2003

IMPORTANT NOTIFICATION

05.06.2002

International application No. PCT/US 03/17300

Applicant THE TEXAS A&M UNIVERSITY SYSTEM et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

 - D3: EP-A-0 369 945 (ALIGENA AG) 23 May 1990 (1990-05-23)
 - D4: RIGHETTI P G ET AL: 'Protein purification in multicompartment electrolyzers with isoelectric membranes' JOURNAL OF CHROMATOGRAPHY B: BIOMEDICAL SCIENCES & APPLICATIONS, ELSEVIER SCIENCE PUBLISHERS, NL, vol. 699, no. 1-2, 10 October 1997 (1997-10-10), pages 105-115, XP004094992 ISSN: 1570-0232
 - D5: US 2002/060154 A1 (VIGH GYULA) 23 May 2002 (2002-05-23)
- Independent claim 1 meets the criteria set out in articles 35(2)-(4) PCT, because 2. the above cited prior art documents do not teach or fairly suggest such a method for separating an ampholytic component by electrophoresis.
- The teaching of prior art is generally the separation of ampholytes at their pl. Here the ampholytic component is separated in an non-isoelectric state (article 33(2)
- 2.2 The advantage over known isoelectric state separations is the velocity of the separation (article 33(3) PCT).
- Dependent claims 2-35 concern particular embodiments of the subject-matter of 3. above independent claim 1, and therefore, they fulfil the requirements of Articles 33(2) - (4) PCT as well.
